

Is your tech up to the challenge?

Introducing the Sensus electromagnetic meter: **iPERL**

Highly accurate measurement at very low flow rates

Reliable detection of empty pipes, backflows and meter tampering

Unlike ultrasonic meters, it remains unaffected by temperature, particles or air bubbles

Unaffected by issues that arise from discontinuous supply

To find out how Sensus can help you to operate more efficiently, deliver water 24x7 and conserve valuable resources, contact AP@xylem.com
