

Sensus Recognized as Smart Grid Leader at 2013 Rural Smart Grid Summit

More than 100 electric cooperatives vote Sensus best smart grid solution

RALEIGH, N.C. (Dec. 3, 2013) ...[Sensus](#), a leading provider of clean technology solutions, received the “Best Smart Grid Product or Solution” award at the fourth annual [Rural Smart Grid Summit \(RSGS\)](#). Over 100 rural electric cooperative executives voted to select Sensus for this award, recognizing Sensus’ commitment to advancing smart grid technologies.

Sensus smart grid technology is driving operational and economic efficiencies for electric, gas and water utilities around the globe. One major component of Sensus’ smart grid solutions is the open standards-based [FlexNet™ advanced metering infrastructure \(AMI\)](#) network, which provides two-way communication technology, smart meters, data analysis and service hosting that allows utilities and their customers to conserve resources, reduce energy costs and lower carbon emissions.

Sensus’ smart grid solution was also recently selected to provide the core communication technology for the northern region of the UK smart [metering program](#).

“We are proud of our role in advancing smart grid technologies and honored to be recognized by the participants of the Rural Smart Grid Summit,” said Rich Creegan, Vice President of Sales at Sensus. “As the need for intelligent energy usage and conservation increases, Sensus is committed to offering comprehensive solutions through our innovative smart grid technologies.”

RSGS is one of three annual Smart Grid Summit (SGS) events focused on business development where rural electric cooperative executives gather with participating vendors to discuss the latest advances and solutions in smart grid technologies.
