

Sensus OMNI Commercial Meters Help Utilities Reduce Costs and Save Water

Zero-lead meters are durable and accurate

RALEIGH, N.C. (Dec. 16, 2013) ... Sensus, a leading provider of clean technology solutions, is helping water utilities conserve water and protect revenue with its OMNI™ collection of zero-lead commercial water meters. Water utilities lose revenue each year due to undetected low water flow. As part of a smart water network, OMNI meters prevent water and utility revenue from circling the drain.

The OMNI collection is the first commercial metering line to offer patented Floating Ball Technology (FBT) and an all-electronic register. These industry-leading technologies ensure water utilities are able to detect leaks, save money and minimize time spent on meter repairs.

"OMNI meters have the precision to capture low flow water usage and the durability to measure high flows with an unprecedented accuracy range," said Doug McCall, director of marketing for Sensus. "And the popular OMNI meter is truly lead-free which helps utilities comply with lead regulations today and into the future."
