Sensus Wins Best Smart Utility Solution Award for Fourth Consecutive Year *Municipal leaders again recognize Sensus AMI solution for smart city innovation*

RALEIGH, N.C. (August 15, 2017) – ([Click to Tweet](#)) – For the fourth consecutive year, the [Sensus Advanced Metering Infrastructure \(AMI\) solution](#) has been honored by municipal utility executives as the “Best Smart Utility Solution” during the [Municipal Smart Grid Summit \(MSGGS\)](#).

The Sensus AMI solution is comprised of smart metering technology and the [FlexNet[®] communication system](#), a two-way network that securely transmits and receives data over licensed spectrum. The FlexNet system allows utilities across water, electricity, gas and lighting to collect, deliver, manage and analyze data while scaling to meet future communication needs.

“As the shift to smart cities continues, municipalities seek innovative technology solutions that transform their communities,” said David Stair, senior director of North America energy sales at Sensus. “Our AMI solution plays an essential role in enabling this transformation, delivering advanced connectivity and functionality that helps utilities improve the lives of the customers they serve.”

The seventh annual MSGGS focused on executives at public power utilities seeking stronger, smarter, more secure and resilient energy infrastructure. The summit featured smart grid technology companies presenting to more than 100 municipal utility executives from across North America.

About Sensus

Sensus helps a wide range of public service providers—from utilities to cities to industrial complexes and campuses—do more with their infrastructure to improve quality of life in their communities. We enable our customers to reach farther through the application of technology and data-driven insights that deliver efficiency and responsiveness. We partner with them to anticipate and respond to evolving business needs with innovation in sensing and

communications technologies, data analytics and services. Learn more at sensus.com and follow @SensusGlobal on [Facebook](#), [LinkedIn](#) and [Twitter](#).

About Xylem

Xylem (XYL) is a leading global water technology company committed to developing innovative technology solutions to the world's water challenges. The Company's products and services move, treat, analyze, monitor and return water to the environment in public utility, industrial, residential and commercial building services, and agricultural settings. With its October 2016 acquisition of Sensus, Xylem added smart metering, network technologies and advanced data analytics to its portfolio of solutions. The Company's nearly 16,000 employees bring broad applications expertise with a strong focus on identifying comprehensive, sustainable solutions. Headquartered in Rye Brook, New York with 2015 revenue of \$3.7 billion, Xylem does business in more than 150 countries through a number of market-leading product brands.

The name Xylem is derived from classical Greek and is the tissue that transports water in plants, highlighting the engineering efficiency of our water-centric business by linking it with the best water transportation of all—that which occurs in nature.
