

# Hear That?

It's the sound of non-revenue water and your budget going down the drain.

## How Much of Your Water is Non-Revenue?

Average of **24%** Per Year

## Lost Water is Lost Revenue

**1.7 trillion gallons** are lost per year – Costing more than **\$2.6B**

## Source of Your Water Loss

**Leaks**

**Theft & Tampering**

**Unbilled Consumption & Meter Inaccuracy**

**Unmetered Consumption**

## Did You Know?

700 water main breaks occur each day in U.S.

Implementing a water loss management program can help you recover up to 75% of water loss

1/3 of utilities report a loss of more than 40% due to leaks

## Ready to save money and water?

**Smart Meters & Sensors**

Capture data and detect critical events within your distribution system

**Utility Grade Network**

Remotely gather system data quickly and reliably

**Analytics**

Derive actionable insights from aggregated system data

**Smart Water Network**

Intelligence built into every point of your distribution network

*"Before deploying Smart Water technology, it was difficult to determine how much water we were losing each year. Today, we know almost immediately when water is being lost and can quickly make repairs."*

- Mark Sprague, Utilities Manager, City of Fountain Valley
