

Smart gas meters just got a lot smarter.

Sensus gives gas utilities greater data, control and safety with the new Sonix IQ ultrasonic residential meter.

20 years in the making. Available today.

Leading the charge in ultrasonic technology development for over two decades, Sensus is now shipping the first commercially available residential-class ultrasonic gas meter that meets strict North American standards.

MEASURES USE

MONITORS PRESSURE

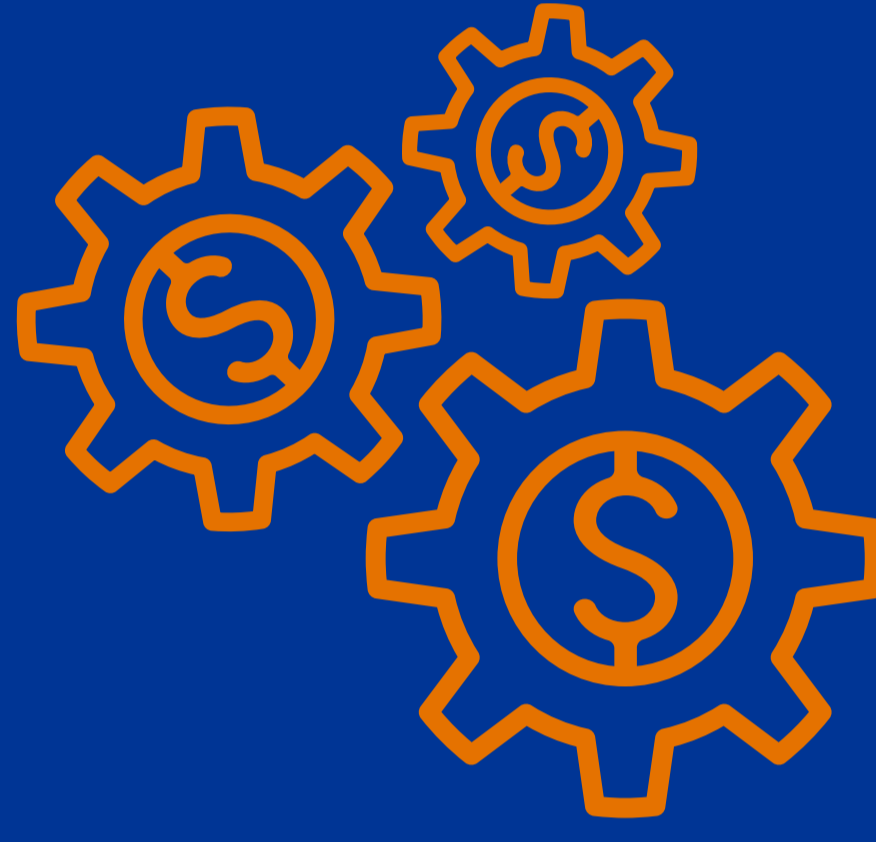

DETECTS THEFT

PROVIDES REMOTE SHUTOFF

INDICATES SYSTEM HEALTH

Streamline your asset management for big value.

The Sonix IQ is the smartest and safest gas meter available, with features that optimize your investment and achieve price parity in the marketplace.

Sleek, compact design half the size of a traditional meter for space-saving inventory and easy installation

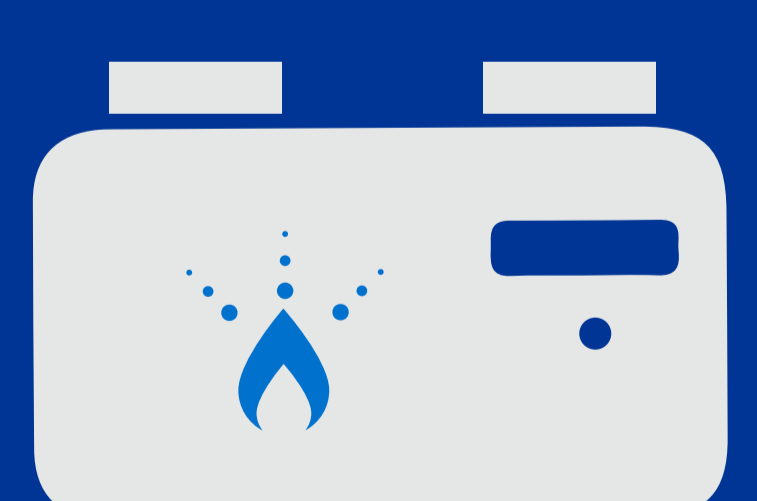

Solid-state ultrasonic technology for pinpoint accuracy over time and no moving parts to wear out or cause measurement drift

Embedded FlexNet® SmartPoint® for single-device management

250 CFH & 400 CFH options for unmatched coverage

20-year battery life for minimal maintenance

See it for yourself.
